

Teach Chronological order

8 min

Teach Chronological order.

Instructions:

1. Acknowledge knowing 123 and ABC is a sign of expertise in the room
2. The facilitator in the front of the room says: "From Left to right/front to back, go A,B,C,D"

- A- Face Grey
- B- Face Orange
- C- Face Blue
- D- Face Green

Tell the room to face this way the whole time.

3. Facilitator goes diagonal to the room if possible. Then says: "Ok, from left to right, front to back, count off 1,2,3,4."
4. Facilitator apologizes and becomes blue facing: "Ok, from left to right, front to back, count off 1,2,3,4."

Questions for discussion:

How long did it take for ABCD vs. 1234?

What were the barriers?

How did you over come those barriers?

Blue, when I faced you, did the task become easier?

How did my representation impact your presentation?
